

# Button Keypad (F1)

KP-39-P3-F1

KP-39 is a compact, wireless button keypad that provides the user simple and easy control of the security alarm functions in their Robin Hub. The arm buttons double as alarm status indicators to provide visual feedback by pressing one button. All keys are backlit for night operation and the keypad includes power and fault indicators, and a buzzer for audible feedback.

## FEATURES

### Indicator arm buttons

Arm, Sleep Arm or Disarm. They also show the system status.

### Backlit keys

Keys only illuminate when you press a button.
